Subject: Fw: AIR TESTING IS GETTING SET UP

Jed and Brian,
Richard Kaufman received this info from some Triangle Lake residents who are conducting air sampling. Can you take a quick look at the equipment they propose to use and see if you see any red flags we might want to make them aware of. I'll ask Richard if the residents would be willing to share their sampling plan.

Sheila

Hello, Maya,

I raised the topic of your air sampling plan in a meeting with EPA this morning, and if you would find it helpful, EPA has offered to have their sampling experts take a look at your plan and provide any relevant advice. I have copied Sheila, Elizabeth, and Scott on this message.

Subject: AIR TESTING IS GETTING SET UP

Hi all,

Just to up date Richard,Jae and Karen,

We are hiring a professional to set up ,calibrate our air testing units ,that will be set up at couple different locations at the home sites of people tested positive with Timber industry poison pesticides.

We are using state of the art equipment,that EPA uses.

TE-1000PUF..... complete system

TE-5040 PUF calibration kit.

TE-QMA4 micro-quartz media

TE-1009...glass cartridge w/ steel screens.

Will be set up by a professional,all done legitimately.

We'll have a base sampling done first.

We are looking forward to share this information with you!

Thanks,

Dan and Maya

p.s. We are taking charge to test the most important element ,since we know that AIR is the MAIN pathway that our families are being sickened by the constant low pesticide exposure ,through **revolatalization** of poison soaked mountains,even months and years after so called spray "season".
